

Roadway: Adequate Capacity and Flow

General Recommendation:
A Consistent 6-Lane Section

ROADWAY

An Urban Boulevard can support high traffic volume and a vibrant streetscape

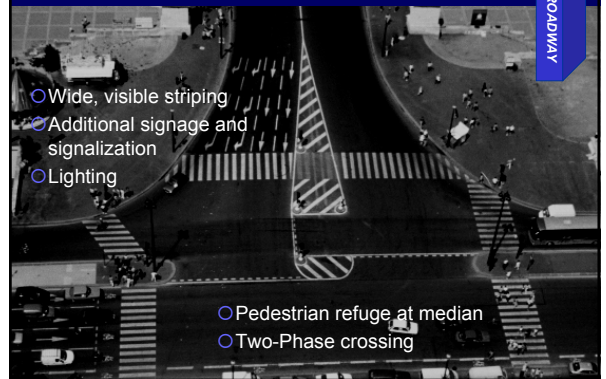

ROADWAY

Michigan Ave in Chicago:
6 thru-lanes, a green median,
and the envy of almost every city in the US

ROADWAY

Wider segments will need additional pedestrian crossing facilities to be safe.

- Wide, visible striping
- Additional signage and signalization
- Lighting

- Pedestrian refuge at median
- Two-Phase crossing

ROADWAY

Walking: Recommendations

○ Comprehensive Streetscape Upgrades

- Consistency Throughout Corridor
- Wide Sidewalks where Possible
- Street Furniture
- Shade Trees
- Pedestrian-scaled Lighting
